Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3-5, 8, 10-12 and 21-28, drawn to a MITE-like element capable of causing duplication of the target sequence (A)_nG(A)_n, a transcriptional activation element containing at least one MITE-like element as a transposable element, a transgene expression cassette, a plasmid and a transgenic plant..

Group II, claim(s) 6-8, 10-12 and 21-28, drawn to a MITE-like element capable of causing duplication of the target sequence TA, a transcriptional activation element containing at least one MITE-like element as a transposable element, a transgene expression cassette, a plasmid and a transgenic plant.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking the inventions of Groups I and II is a MITE-like element. However, a MITE-like element is disclosed by each of BUREAU et al. (Plant Cell, June 1994, Vol. 6, No. 6, pages 907-916, Applicant's Search Report), BENEDICTE CHARRIER et al.

(Plant Journal, May 1999, Vol. 18, No. 4, pages 431-441, Applicant's Search Report), and ELENA CASACUBERTA et al. (Plant Journal, October 1998, Vol. 16, No. 1, pages 79-85, Applicant's Search Report), and therefore does not constitute a special technical feature as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. The special technical feature of Group I is a MITE-like element that is capable of causing duplication of the target sequence (A)_nG(A)_n, and the special technical feature of Group II is a MITE-like element that is capable of causing duplication of the target sequence TA.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
